OFFICE OF THE BURSAR

November 18, 1941.

Dr. H. C. Burleigh,
Bath, Ont.

My dear Dr. Burleigh:

I haven't done any research on the Shibley family in a long time. I have wondered if you found any more information.

I am enclosing the records that I have. If there is anything that you do not have, you are welcome to it. If you have anything in addition, I shall be glad if you will send it to me.

I have been informed that John Shibley lived at Flatbush, N.Y. before he joined Jessup's Rangers.

My great grandfather, Johannes Van Valkenburg, was also a Loyalist. He married Hannah Patterson and they lived at Fonda, New York, before they went to Canada. That is about all I know of them. They also lived at Bath. If you run across anything about them, I shall appreciate it if you will let me know.

Sincerely yours,

(Miss) Pearl Van Valkenburg

The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. It is shown that the structure of the atom is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are based on the principles of wave mechanics. The second part of the paper is devoted to a discussion of the application of the theory of the structure of the atom to the study of the properties of matter. It is shown that the theory of the structure of the atom can be used to explain the properties of matter, and that the properties of matter can be used to determine the structure of the atom.

Handwritten text in Arabic script, consisting of approximately 15 lines. The text is written in a cursive style and is mostly illegible due to fading and the quality of the scan. The lines are arranged in a single column, with some variations in line length and spacing. The ink appears to be dark, but the overall contrast is low, making it difficult to discern specific words or phrases. The text seems to be a continuous passage, possibly a letter or a section of a manuscript.
